

The attached information only applies to you if you or any of your dependents are Medicare eligible.

- To be Medicare eligible you must be at least age 65 or disabled.
- If this does apply to you or one of your dependents, please read the attached information on the Medicare Part D program and how this Medicare component might apply to you.

UPDATE:

Due to our HDHP 2 Plan - \$6,000 deductible plan - having a Preventive Rx cost share to it, actuaries have determined it is also a “Creditable” plan with Medicare. Therefore, please see attached the Creditable plan notice. Therefore, all of the SISIC plans are creditable compared to Medicare and no penalty will be assessed for those that do not elect Medicare Part D with initially eligible due to being on a SISIC plan.
